PRECAST CONCRETE SOLUTIONS

Cattle Underpasses

CROOM CONCRETE

# WHAT WE OFFER:

We can organise the complete package for our clients

- Applying for planning permission
- Submitting road opening/closing licences
- Organising and setting up traffic management plans
- Full civil package
- Underpass installation work
- Road reinstatement
- Full project supervision at all stages by our design team of chartered engineers, health and safety team, civil department.

Croom are unique in that at completion stage of the project, our own in-house structural engineers can sign off on all aspects of the project, from road safety audits, method/safety statement documentation, certification and insurance. This is something that council authorities throughout the country are insisting on because of the increase in underpasses being installed and to comply with regulations.

We work with our clients to ensure all underpasses are installed safely, on programme, as per specification and within the budget.
